e-Banking

Quipu e-Banking is an online banking application that allows customers to manage their accounts via the Internet. Financial institutions can increase customer satisfaction by enabling them to check their account balances, make both domestic and international transfers, and conduct foreign exchange transactions from the comfort of their home or office at any time of day.

From the client's point of view, the Quipu e-Banking website is easy to navigate and highly secure. Quipu e-Banking also includes a Mobile Services component, which means that, in addition to using their phone browsers, clients can also access information and make transactions via text message wherever they are.

Quipu e-Banking uses the latest online banking technology and offers:

▸ flexibility, so that it can be easily adjusted to the local regulations of any country

▸ an easy-to-use interface

▸ a very high level of security

▸ integration with third party tools and services
